### **Current employees who were previously working in the public sector**

TI-UK believes that exchanges of expertise and information between public and voluntary sector can make a positive contribution to the public interest. However, TI-UK also believes that the so-called Revolving Door can at times lead to conflicts of interest, and that these need to be appropriately identified, managed and mitigated. TI-UK's [Policy on Advocacy & Political Engagement](#) outlines our policy on the revolving door.
